

Bleep UK PLC designs and manufactures its own innovative, flexible and reliable Electronic Point of Sale (EPOS) solutions, servicing the hospitality and retail industries for over 30 years. Our proven track record ensures that we can provide a suitable EPOS solution for any business, for any requirement, in any industry.

Simply put, Bleep UK PLC is one of the only companies in the UK which design and manufacture its own EPOS terminals.

Bleep was founded in 1981 and designs, develops, manufactures and supports Point of Sale equipment and software applications for the retail and hospitality industries.

Bleep products are recognised throughout the world for innovation, quality and performance, testament to the experience we have gained servicing these industries. Our client list is very impressive, with over 25,000 installations in the UK, with our attention to product reliability and customer support ensuring our user base continues to increase year on year.

## Mission Statement

To establish Bleep as a market leader manufacturer of cost effective EPOS solutions through continued Research and Development and high quality Customer Service and Support.

## Bleep in Brief

- Established in 1981
- Pioneered Touch Screen technology within EPOS Terminals
- Committed to Research & Development
- Offices in UK, Portugal and Hong Kong
- Manufacturing plant in Taiwan
- In-house team consisting of Sales, Support, Technical and Software
- Proven track record supplying all industries
- Clients include, small family run businesses, award winning restaurants, high profile arenas and multi-site corporations

Bleep pioneered Touch Screen technology within EPOS terminals and also introduced the world's first terminal operating on compact flash. These two innovations revolutionised the industry and Toshiba TEC took distribution rights for Europe and the Americas under its own brand name.

Although our products and services have seen significant developments over the years which allow us to meet the varied needs of the marketplace, our objectives remain the same, as we aim to provide innovative, high quality, easy to use and reliable EPOS solutions, no matter what the industry, the size or the individual need.

We pride ourselves upon Research and Development and a considerable annual budget is allocated to a highly experienced R&D team based in London. Our products are then manufactured in our factory in Taiwan and managed through our Hong Kong offices, ensuring economic and operational benefits. The entire Bleep operation is managed in the UK from our three main operating centres, including our Head Office in London, and regional offices in Preston and Dundee.

Bleep products are recognised throughout the world for innovation, quality and performance, testament to the experience we have gained servicing these industries.

Our client list is very impressive, with over 25,000 installations in the UK, with our attention to product reliability and customer support ensuring our user base continues to increase year on year.

## Why Bleep?

- Over 30 years experience in the Hospitality and Retail industries
